Dear Councilman Gloria,

After four hours of public testimony, without discussion, Commissioner James Whalen made a confused motion which was immediately seconded.

Then they spent over an hour going back and forth about what they were actually voting on... keeping the 1988 plan, adopting the new plan, or part of this plan and part of that plan, and then throwing in no height limits anywhere. Around and around and back and forth.

No substantial discussion, just attempts to clarify what most of them clearly did not understand. Two had recused themselves. It appeared to observers that most of them simply did not really understand the elements of a community plan and all that it entailed.

What a travesty, and such a waste of the community's time, and the staff's time, over a very very long time.
